Robotic pallet truck
T-MATIC

Series 131-01

Safety

Thanks to its smart safety management, the T-MATIC anticipates and reacts autonomously to its direct environment. Advanced obstacles' detection provides real time speed adjustment to enhance the productivity while offering the utmost safety.

Performance

The unique infrastructure-free geoguidance system makes the solution flexible and scalable. Stand alone or within larger fleets of robotic trucks, the T-MATIC can easily interact with the customer's environment (doors, conveyors..) and even interface with WMS/ERP. The T-MATIC will always deliver the optimal drive speed to achieve the maximum throughput.

Comfort

The T-MATIC is natively designed to work in a shared environment with people. The user-friendly interface provides all needed controls & information at a glance. Moreover, the dual driving mode makes the T-MATIC intuitive to switch automatic/manual.

Linde Material Handling

Reliability

Fully integrated in the warehouse product range, the T-MATIC benefits from all Linde quality standards, and the robust "DRIVEN BY BALYO" navigation technology. Always available, the T-MATIC will support your business 24/7 while offering significant costs-savings.

Productivity

Efficiency at work, efficiency in servicing.
With a computerized & remote diagnostic system, combined with predictive maintenance program, the T-MATIC remains available at any time.

Features

Driving system

- → Standard truck converted into a robotic truck
- → Dual driving mode - automatic/manual
- → Navigation laser, safety front scanner, rear perception lasers, 3D camera, embedded computer, emergency stop buttons, light and sound warning indicators

Geoguidance navigation

- → Innovative infrastructure-free technology (no reflector)
  Relies on existing structural features (walls, columns, racks...)
- → Real time mapping and localization
- → Seamless integration in existing layouts, gradual extension or global deployment

Smart safety

- → Real time speed-adaptive detection fields
- → Dynamic cornering detection fields
- → Autonomous decision-making capability with 3D camera
- → Natural cohabitation with operators and other trucks
- → Pallets or obstacles detection thanks to the rear laser scanner

User interface

- → 7'' LCD touch screen
- → Robotic truck, battery and system status
- → Real time task management and report
- → Intuitive path localization
- → Service mode with PIN access
- → Log extraction via USB

Operations management

- → Long transfers management
- → Stand alone or WMS/ERP directed
- → Supervisor software for task and smart traffic management
- → Various task triggers: call buttons, sensors, PLCs, Supervisor software ...

Standard Equipment/Optional Equipment

Standard Equipment

Navigation module on a robust frame with lighting signals, control panel, touch screen, communication module, navigation laser, front safety scanner, rear perception, traction/steering & lifting software management
Drive wheel and tandem load wheels polyurethane
540 mm load arms
Lateral change 3PzS
Forks dimensions 540/2400/563
Pre-setting for wet battery
Key switch truck acess
Polycarbonate mast protection
Load detection sensor
3D camera for volume perception (technical conditions apply)

Optional Equipment

Load backrest h=1000 mm
Tandem load wheels greasable
Pre-setting for gel battery
Fixed battery stand 2 batteries
Mobile battery trolley 1 battery
Cable/connector Flex
Cable/connector Perfect
3 m cable extension
2D curtain laser
Blue spots single
Additional louder horn
Bar code reader, call button (COMBOX), various sensors...
